The diagram illustrates a 128x128 bit matrix. A horizontal double-headed arrow at the top indicates the total width is 128bits. A vertical double-headed arrow on the left indicates the total height is 128bits. A 16x16 sub-matrix is highlighted in the top-left corner, with a horizontal double-headed arrow above it labeled 16bits and a vertical double-headed arrow to its left labeled 16bits. The sub-matrix consists of 16 columns and 16 rows of cells, each containing a bit value (0 or 1). The cells are arranged in a grid where the first row and first column of the sub-matrix are all 1s, and the rest of the cells are 0s.

FIG. 54

The diagram shows a 256-bit by 256-bit grid. A 160-bit by 160-bit subgrid is highlighted with a dashed border. This subgrid is further divided into four 80-bit by 80-bit quadrants. The top-left quadrant is labeled '59' with a dashed arrow. The grid contains various symbols: diamonds, stars, circles, triangles, and crosses. Arrows labeled 'p' and 'q' indicate a path within the subgrid. The grid is composed of various symbols: diamonds, stars, circles, triangles, and crosses.
